New Delhi

EDUCATION

Guru Gobind Singh Indraprastha University

Bachelor Of Technology (CSE)

2019-2023

CGPA: 8.7

Hans Raj Model School

High School

2017-2019

Class XII: 83.4%

Class X: 9.2 CGPA

CERTIFICATES

Learning Advanced React by Meta via Coursera

Data Structures and Backend with Java by Board Infinity via Coursera

Java Programming Masterclass by Tim Buchalka.

SQL and Relational Databases 101, Provided by IBM.

SKILLS

Java

Python

AWS

DSA

SQL

PROFILE

Results-driven Software Developer and DevOps Engineer with a strong foundation in cloud infrastructure, data engineering, and backend development. Skilled in building scalable data processing pipelines, optimizing database performance, and automating CI/CD workflows using AWS services, PySpark, FastAPI, and GitHub Actions. Adept at managing critical deployments, conducting root cause analysis, and ensuring high system availability in production environments. Passionate about delivering clean, reliable, and high-impact solutions that align with business goals.

WORK EXPERIENCE

Software Engineer

Tata Consultancy Services

June'24 - Current

- Cloud & CI/CD Automation: Developed AWS Glue jobs and Lambda functions for scalable data processing; integrated GitHub Actions for automated deployments. Reconfigured SFTP to file-copying in Lambda and deployed core fixes during holidays for critical workflows.
- Database Performance Tuning: Optimized PostgreSQL queries using B-tree indexing and CTEs, reducing FastAPI response times by 98% (from 5–10 mins to 4–5 secs); led RDS IAM authentication POC.
- AWS DMS & Workflow Optimization: Cut DMS job time by 80% via smart condition checks and removal of blocking sleeps; resolved inefficiencies and automated status-based execution.
- Data Engineering: Automated large-scale data processing with PySpark and Pandas, eliminating Excel dependency and manual effort through optimized SQL comparisons.
- Incident & Release Management: Delivered rapid hotfixes for critical issues with thorough testing, enabling 99%+ system uptime and on-time production deployments, even during off-hours.

Web Developer Intern

NullClass

October'23 - February'24

- Created new HTML templates, CSS stylesheets, Javascript code and other programming languages which were needed to support the functionality of the website
- Tested web pages for functionality and usability, including conducting user testing sessions with customers or clients.
- Assisting developers in creating websites by performing tasks such as creating database structures and writing code.

Technical Writer

Freelance

August'22 - November'22

- Utilized exceptional writing, editing, and proofreading skills to produce engaging and error-free content.
- Analyzed developments in the field to update instruction literature.
- Used coordination and planning skills to achieve results according to schedule
