TECHNICAL SKILLS

- Programming Languages:** Python, SQL
- Frameworks/Tools:** ReactJS, Git, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Docker, FastAPI
- Cloud Services:** AWS, Azure, GCP
- Databases:** MySQL, PostgreSQL, DynamoDB, Vector Databases (Pinecone)
- Authentication & APIs:** OAuth 2.0, Single Sign-On (SSO), HTTPS, RESTful APIs, GraphQL
- AI/ML & GenAI Skills:** LLMs (GPT-4o, USE), Prompt Engineering, Retrieval-Augmented Generation (RAG), Embedding Models, Semantic Search, Model Evaluation & Optimization, Structured Outputs, Multi-Step Workflows, Hallucination Detection, Agentic Workflows
- Other Skills:** Design Patterns, Agile Methodology, CI/CD, Task Orchestration, Retries/Fallbacks, Batching, Monitoring

EXPERIENCE

Tata Consultancy Services, Noida

Developer

Jun 2022 - Present

- GenAI Incident Resolution Assistant** May 2025 – Present
 - Built a **Generative AI solution using GPT-4o** to generate automated incident resolutions in **ServiceNow**, reducing **mean time to resolution (MTTR)** by **45%**.
 - The solution integrates a **vector database of 1M+ historical incidents and knowledge articles** to provide **context-aware answers** and reference similar past incidents, improving **reliability, grounding, and transparency**.
 - Designed **data pipelines for dataset creation and embeddings**, configured **retrieval workflows**, and automated **queries to an API-based GPT-4o model with schema-validated structured outputs and multi-step orchestration**.
 - By automating **incident triage** by surfacing relevant past cases and draft resolutions, the system reduced the manual search and resolution drafting effort for **L1/L2 teams by 50%**.
 - Implemented a **feedback loop with preprocessing pipelines to inject new data into Pinecone**, enabling continuous learning, output evaluation, and hallucination detection for each recommendation.
- Application Impact Assessment & Remediation Tracker** Nov 2024 - May 2025
 - Led a team of 5 developers** to design and deploy a **FastAPI-based backend** with **Aurora PostgreSQL**, enabling **real-time tracking of all applications** affected by version expirations.
 - Containerized FastAPI services with Docker** and deployed as **AWS Lambda container images**, ensuring scalable and serverless API deployment.
 - Developed a **custom query engine** to retrieve impacted applications from **ServiceNow**, streamlining assessment requests and reducing manual effort by **50%**.
 - Automated **survey-based assessments** with **reminder workflows**, improving **stakeholder response rates by 40%** and ensuring remediation tracking until completion.
 - Hosted **React frontend**, integrated **SSO (MSAL module)**, **email automation**, and **real-time Power BI reports**, enhanced **security and operational efficiency by 35%**, and provided actionable decision-making insights.
- Deep Learning Model Development** Mar 2024 - Nov 2024
 - Achieved **94% accuracy** on **100,000+ data points** by developing a deep learning model with the **Universal Sentence Encoder (USE)** and **TensorFlow**.
 - Reduced training and deployment time by **40%** using **AWS SageMaker Studio** and ensured scalability for processing up to **10,000 requests per hour**.
 - Reduced operational costs by **35%** through serverless endpoint implementation and automated model retraining to maintain accuracy above **90%**.
 - Managed predictions for **1+ million records** using **DynamoDB**, integrating with **AWS Lambda** to deliver real-time responses in under a **few seconds**.
 - Deployed a **secure, scalable frontend with API Gateway, OAuth 2.0 SSO, and AWS CloudFront caching**, improving **latency by 50%** and ensuring **99.9% uptime**.
- AWS Infrastructure Development** Jun 2023 - Feb 2024
 - Designed and optimized **AWS infrastructure** that supported **10K+ monthly transactions** with **99.9% uptime**.
 - Automated **deployments with GitHub Actions and CloudFormation**, reducing **deployment time by 50%** and improving overall reliability.
- Azure-Based Chatbot Solutions** Jul 2022 - Jun 2023
 - Developed an **AI-driven task automation chatbot** using **Azure Bot Service, Bot Composer, and Cosmos DB**, improving **operational efficiency by 40%**.
 - Optimized performance with **Azure Functions**, reducing **backend response time by 25%**, and implemented **SSO authentication** for **15,000+ users**.
 - Enabled **role-based access control** for **10+ user roles** via **Active Directory authorization** and enhanced **intent recognition to 95%** with **Azure Cognitive Services**.

CERTIFICATION

- [Microsoft Certified: Azure AI Engineer Associate](#) Mar 2025
- [AWS Certified Solutions Architect – Associate](#) Oct 2024
- [AWS Certified Cloud Practitioner](#) Sept 2023
- [AWS Partner: Generative AI Essentials](#) Sept 2023

EDUCATION

- Galgotias College of Engineering and Technology, Noida Jul 2018 - Jul 2022
Bachelor Of Technology (Computer Science Engineering) CGPA – 8.6
